CRAWFORDTECH QA SUITE

Automate Quality assurance Workflows

OVERVIEW

Many organizations are challenged with achieving robust and efficient automated quality assurance testing for their customer communications. It can be difficult to manage the tools and resources needed for effectively testing transactional documents, and the risks of sub-standard testing can be significant.

CrawfordTech QA Suite Overview

Crawford Technologies has assembled a selection of powerful solutions that provide all of the tools needed to automate robust document-related Quality Assurance regression testing processes, allowing QA to be done on a continuous cycle instead of as a labor intensive one-off step. These solutions provide a number of benefits, including:

- Improved quality control reduces errors and associated costs
- Better utilization of quality assurance staff allows you to do more with less
- Cost savings from using a cloud deployment will reduce infrastructure costs
- Less time and money is spent recovering from errors in customer communications
- More reliable release cycles can be maintained
- Market opportunities can be addressed quicker by achieving faster release schedules

Scalable and Flexible Licensing Options

The CrawfordTech QA Suite includes products such as:

- QA in the Cloud is a cloud-based solution which provides fully automated life cycle testing of any document creation and processing applications.
- QA in the Cloud On Premise Deployment provides all of the QA In The Cloud capabilities, but is run on your own servers.
- Review & Release enables non-IT staff with the ability to suppress Holds and Pulls prior to printing of transactional print streams, avoiding the manual physical hunting of unwanted or incorrect documents.

With CrawfordTech QA Suite you can automate quality assurance processes, reduce or eliminate the risks of ineffective testing, and save time and money. Effective automated testing ensures that you can respond to changing market needs more promptly and maintain reliable release schedules – keeping your customers happy and protecting your bottom line.

CrawfordTech Solutions

Crawford Technologies develops software and solutions to help enterprises optimize and improve the secure and accessible delivery, storage and presentment of their customer communications.

With over 1,800 customers on six continents, CrawfordTech solutions and know-how enable the largest banks, insurers, healthcare providers, utilities and print services companies to use their existing technologies, documents and data in new ways. We help them navigate the challenges in leveraging legacy applications in the platforms and applications of the future.

CrawfordTech's products, services and domain expertise reside at the nexus of content, data, and output management and are essential components of our customers' digital transformation, output management and document accessibility strategies.
